DUTIES & RESPONSIBILITIES

- Clinical Assessment & Monitoring: Monitor vital signs, assess patient conditions, and report critical changes to healthcare providers for timely intervention in both hospital and home care settings.
- Emergency & Critical Care: Provide life-saving support, including Code Blue responses, and manage care for critically ill patients.
- Treatment, Diagnostics & Medication Support: Coordinate with healthcare teams, assist in diagnostic procedures, manage blood collections, transfusions, and medication administration.
- Home Health Care & Rehabilitation: Deliver nursing care at patients' homes, including hygiene, mobility assistance, wound care, nutritional support, and rehabilitation guidance.
- Patient Advocacy & Education: Advocate for patients' rights, educate patients and families on health conditions, medication adherence, and lifestyle modifications for better outcomes.
- Pain & Comfort Management: Implement and monitor comprehensive pain management plans while ensuring patient comfort and well-being.
- Infection Control & Safety: Maintain sterile and safe environments, follow infection control protocols, and troubleshoot medical equipment to prevent delays in care.
- Clinical Documentation & End-of-Life Care: Accurately maintain patient records, document complications and adverse reactions, and provide emotional support during critical care or end-of-life situations.
