PROFESSIONAL SUMMARY

3 years of hospital pharmacy experience in a tertiary care healthcare setting, specializing in medication dispensing, prescription verification, and patient counseling within high-volume clinical environments. Strong expertise in drug interaction screening, dosage calculations, pharmacovigilance, and ADR reporting, with hands-on involvement in inventory management, expiry audits, and pharmacy operations. Proven ability to support physicians and multidisciplinary teams with evidence-based drug information while maintaining strict regulatory compliance and accurate pharmacy documentation through pharmacy information systems.

PROFESSIONAL EXPERIENCE

Pharmacist Amrita Institute of Medical Sciences and Research Centre, Kochi, India | Feb 2023 – Nov 2025

- Achieved high-accuracy medication dispensing, as demonstrated by consistently error-free processing of 200+ prescriptions per shift, through thorough prescription verification, dosage calculation, and adherence to pharmacy legislation and hospital protocols.
- Achieved improved patient medication adherence, as demonstrated by clearer patient understanding of dosage, side effects, and storage requirements, through structured one-on-one counseling and patient-focused communication.
- Achieved reduced risk of adverse drug events, as demonstrated by early identification of drug–drug interactions, contraindications, and therapeutic duplications, through systematic prescription review and application of clinical pharmacology principles.
- Achieved effective clinical support to physicians, as demonstrated by timely drug information and therapeutic recommendations, through evidence-based practice and collaboration with multidisciplinary healthcare teams.
- Achieved strong pharmacovigilance compliance, as demonstrated by accurate documentation and reporting of adverse drug reactions, through continuous medication therapy monitoring and adherence to regulatory reporting standards.
- Achieved 99–100% accuracy in medication preparation by compounding and reconstituting antibiotics using strict aseptic techniques, with zero reported medication errors during audits.
- Achieved optimized inventory control, as demonstrated by reduced expiry-related wastage and uninterrupted medicine availability, through proactive stock monitoring, expiry audits, and proper storage management.
- Achieved audit-ready pharmacy operations, as demonstrated by accurate prescription entries, billing records, and documentation, through effective use of pharmacy information systems and regulatory compliance procedures.

Pharmacy Intern Daya General Hospital, Thrissur, Kerala, India | **Professional Training – 150 Hours**

- Achieved improved inventory organization, as demonstrated by accurate stock rotation and expiry monitoring, through hands-on involvement in hospital pharmacy inventory management.
- Achieved safe dispensing support, as demonstrated by accurate assistance in prescription processing and interaction screening, through close supervision by senior pharmacists and adherence to dispensing protocols.
- Achieved enhanced patient awareness, as demonstrated by correct medication usage and adherence understanding, through patient and caregiver education on dosage schedules and storage requirements.

SKILLS

Clinical & Patient Care Skills

- **Prescription verification:** Ensured accurate interpretation of physician orders by reviewing dosage, frequency, contraindications, and therapeutic duplications before dispensing.
- **Medication dispensing:** Delivered safe and compliant dispensing of high-volume inpatient and outpatient prescriptions while adhering to hospital pharmacy protocols.
- **Patient counseling:** Educated patients on medication usage, side effects, adherence, and storage to improve treatment outcomes and medication compliance.
- **Clinical pharmacology:** Utilized drug mechanism knowledge and evidence-based references to support safe medication use and therapeutic decision-making.
- **Dosage calculations:** Performed accurate dose calculations for adult and special-population prescriptions to prevent medication errors.

Medication Safety & Pharmacovigilance

- **Drug interaction screening:** Identified and mitigated potential drug–drug and drug–disease interactions through systematic prescription review.

- **Pharmacovigilance:** Monitored ongoing medication therapy and documented adverse drug reactions in accordance with hospital and regulatory reporting standards.
- **ADR reporting:** Maintained accurate adverse event documentation to support patient safety initiatives and regulatory compliance.
- **Medication safety practices:** Followed aseptic techniques and safety protocols during compounding, reconstitution, and labeling of medications.

Hospital Pharmacy Operations

- **Inventory management:** Maintained optimal stock levels by conducting expiry audits, monitoring consumption patterns, and ensuring uninterrupted medicine availability.
- **Pharmacy operations:** Supported day-to-day hospital pharmacy workflows, including dispensing, compounding, documentation, and coordination with healthcare teams.
- **Pharmacy information systems:** Managed prescription entries, billing records, and pharmacy documentation using digital pharmacy systems to ensure audit readiness.

Regulatory & Compliance Skills

- **Regulatory compliance:** Ensured adherence to pharmacy legislation, hospital policies, and professional standards through consistent compliance checks and documentation.
- **Documentation & record management:** Maintained accurate pharmacy records, prescription logs, and billing documentation to meet internal and external audit requirements.

Collaboration & Professional Skills

- **Communication:** Communicated clearly with patients, physicians, and nursing staff to ensure safe medication use and coordinated patient care.
- **Team collaboration:** Worked closely with multidisciplinary healthcare teams to support therapeutic decisions and optimize treatment outcomes.
- **Time management:** Managed high prescription volumes efficiently while maintaining accuracy, safety standards, and workflow continuity.
