Professional Experience

Staff Nurse – Labour and Delivery Unit

N.S Memorial Institute of Medical Science Hospital, Kerala, India | May 2022 – Aug 2025.

- Assist in normal and high-risk deliveries, providing continuous maternal and fetal monitoring.
- Develop and implement individualized care plans for labouring mothers.
- Administer prescribed medications and IV fluids while observing for reactions and side effects.
- Monitor and evaluate fetal well-being using internal and external cardiotocography (CTG).
- Support and monitor patients during labour induction and throughout all stages of labour
- Provide specialized care for high-risk pregnancies such as diabetic, PIH, anemia, and sickle cell patients using PCA.
- Prepare patients for medical examinations and surgical procedures such as C-sections.
- Maintain strict adherence to infection control and hospital safety protocols.
- Support physicians during invasive and non-invasive procedures in the labour room.
- Provide emotional support to mothers and families throughout the birthing process.
- Monitor and record vital signs, fetal heart rate, and patient progress.
- Manage wound care and postpartum recovery, ensuring optimal healing.
- Collect blood and body fluid samples for diagnostic testing.

- Maintain labour and delivery register and ensure proper documentation.
- Participate in quality improvement, risk management, and patient safety initiatives.
- Assist with newborn resuscitation, immediate baby care, and Apgar scoring.
- Ensure safe patient transfer and support in admission and discharge processes.
- Demonstrate leadership in the absence of the Charge Nurse, ensuring smooth workflow.
