## WORK EXPERIENCE

### Registered Nurse

| March 2022 – Present

#### Aster DM Healthcare | Dubai, United Arab Emirates

- Administer medications via oral, IV, and intramuscular routes, carefully monitoring patient responses and adjusting care as needed.
- Managed comprehensive care for patients with complex conditions, including heart failure, end-stage renal disease, and coronary artery disease.
- Collaborated closely with physicians and multidisciplinary teams to rapidly assess patient conditions and implement appropriate treatment plans.
- Conducted ongoing patient monitoring, including vital signs, symptoms, and responses to treatments, to ensure optimal care outcomes.
- Performed advanced clinical procedures including IV therapy, catheter insertion, wound care, and airway management.
- Collected and processed blood, tissue, and other laboratory specimens accurately for diagnostic testing.
- Advocated for patients' needs and preferences, ensuring care plans aligned with their goals while navigating insurance coverage and treatment limitations.
- Provided patient and family education on disease management, medication administration, and post-discharge care.
- Maintained accurate, detailed documentation of patient care, interventions, and progress for medical records compliance.

### Registered Nurse

| May 2021 – February 2022

#### Gimcare Hospital | Kannur, India

#### Department : Emergency Department

- Administered medications via oral, IV, and intramuscular routes, closely monitoring patient responses and reporting critical changes.
- Assessed, stabilized, and provided direct care to patients in a fast-paced emergency setting, determining appropriate next steps in collaboration with physicians.
- Monitored patient condition using EKG and telemetry, identifying irregularities and communicating changes to the care team promptly.
- Educated patients, families, and caregivers on disease management, treatment options, wound care, medication adherence, and post-discharge instructions.
- Participated in nursing simulation activities, evidence-based practice projects, and competency development programs to enhance clinical skills and knowledge.
- Provided orientation, mentorship, and hands-on training to new nurses and student nurses to ensure adherence to clinical protocols and care standards.
- Implemented critical nursing procedures including IV therapy, medication administration, catheter insertion, and airway management.
- Collected, labeled, and prepared blood, tissue, and other laboratory specimens accurately for testing and diagnostic purposes.
- Audited patient charts and reviewed clinical documentation to ensure accuracy, compliance, and quality of care.
