Profile

Seeking a challenging Dialysis Technician position where education and practical experience. As a Dialysis Technician, I am dedicated healthcare professional with expertise in operating dialysis equipment and providing compassionate care to patients with kidney related issues. I will allow for personal growth and development along with the firm through performance.

Professional Experience

DIALYSIS TECHNICIAN

Taluk Head Quarters Hospital – North Paravur, **NOV 2022 - SEP 2025**
Ernakulam, Kerala

Responsibilities :

- Patient assessment: Conducting initial assessments of patients, reviewing medical records, and gathering relevant information to create a treatment plan.
- Dialysis machine setup: Setting up and preparing dialysis machines, ensuring proper functioning and sterilization of equipment.
- Patient monitoring: Monitoring vital signs, fluid balance, and overall well-being of patients during dialysis treatments.
- Dialysis procedure execution: Safely connecting patients to dialysis machines, administering medications as prescribed, and monitoring the treatment process.
- Troubleshooting and maintenance: Identifying and resolving technical issues with dialysis machines, maintaining cleanliness and sterility of the dialysis area.
- Patient education: Providing information to patients and their families regarding dialysis procedures, dietary guidelines, and self-care techniques.
- Documentation: Accurately recording patient data, treatment progress, and any observed complications during dialysis sessions.
- Collaborating with healthcare team: Working closely with doctors, nurses, and other medical professionals to ensure effective patient care and treatment coordination.
- Adherence to safety protocols: Following strict infection control protocols, maintaining a safe and clean environment, and promoting a culture of patient safety.
