PROFESSIONAL SUMMARY

DHA-qualified Clinical Pharmacist with 2 years of experience in a multi-speciality hospital. Expertise in medication therapy management, antimicrobial stewardship, and pharmacovigilance. Proven success in optimizing drug therapy for critical care, transplant, and oncology patients through multidisciplinary collaboration. Dedicated to enhancing patient safety and outcomes through evidence-based practice.

PROFESSIONAL EXPERIENCE

APOLLO MULTI-SPECIALITY HOSPITAL

March 2023 – April 2025

CLINICAL PHARMACIST

BANGALORE, INDIA

- Led clinical interventions during ICU, transplant, and oncology rounds, optimizing pharmacotherapy and antimicrobial regimens to improve patient outcomes.
- Enhanced medication safety by performing admission/discharge reconciliation and reviewing 200+ weekly prescriptions to resolve drug interactions and errors.
- Optimized high-risk drug therapy through Therapeutic Drug Monitoring (TDM) and precise renal/hepatic dose adjustments, maximizing efficacy and minimizing toxicity.
- Managed sterile compounding for chemotherapy and pediatric preparations, adhering to strict aseptic and safety protocols.
- Strengthened pharmacovigilance by documenting and submitting 30+ ADR reports to CDSCO, driving systemic safety improvements.
- Orchestrated patient/caregiver counseling on medication management, significantly improving adherence and therapeutic understanding.
- Ensured strict regulatory compliance for narcotics and emergency stocks through meticulous documentation and inventory control.
- Elevated team competency by developing and leading training on medication safety, stewardship, and rational drug use for staff and interns.

THE OXFORD MEDICAL COLLEGE HOSPITAL

December 2021 – December 2022

CLINICAL PHARMACIST INTERN

BANGALORE, INDIA

- Conducted medication reviews and prescription screening across General Medicine, Surgery, Orthopedics, and OB-GYN wards, identifying opportunities to optimize therapy and prevent errors during clinical rotations.
- Supported Therapeutic Drug Monitoring (TDM) and renal/hepatic dose adjustments under supervision, contributing to safe and effective pharmacotherapy for patients with complex needs.
- Strengthened pharmacovigilance practices by actively monitoring, documenting, and reporting therapy-related adverse drug reactions (ADRs).
- Collaborated with multidisciplinary teams to support adherence to evidence-based treatment guidelines and provided patient counseling to enhance medication understanding and adherence.
