Experience

September 2024

Liv Hospital, Dubai, The UAE

Emergency Room Registered Nurse

Working in the Emergency Department in a high-quality team made me a nurse who has experience in treating multiple life-threatening conditions such as various kinds of shocks, STEMI, stroke, tension pneumothorax, and cardiopulmonary resuscitation.

2021-2024

Dena hospital, sattarkhan St, Shiraz, Iran

Cardiovascular Intensive Care Nurse and Medical-surgical Nurse

Dena is a 200 beds hospital with 13 CICU beds. Most of the patients admitted to CICU are neonates with congenital heart defects (ASD, VSD, TOF, PDA...) and adults who have undergone major heart surgeries such as CABG, repair and replacement of valves that need constant care . Dena Hospital CICU has a 1-2 patient to 1 nurse ratio.

Extensive nursing care should be done in the CICU but some of them are more important than others such as continuous heart monitoring for early recognition and treatment of any arrhythmias such as Af, Atrial Flutter, PSVT, AV Blocks, PVC, VT, and vital signs monitoring such as IBP, CVP, PAP, and early realizing and correction of any instability in hemodynamic status with fluid therapy and starting inotropes, vasopressors, vasodilators and...

Critical care nursing and critical thinking are the two key skills I developed while working in this CICU

There is a 32 beds surgical ward in Dena Hospital that is for patients who have undergone general surgeries, urology surgeries, orthopedics surgeries, or ENT surgeries, I was a staff nurse for about 3 years at this ward and assessed the patients, checked vital signs, insertion of cannula, IV therapy, changed dressing, administered medication, and care of catheters such as NGT, internal foley, removal, JP, Penrose and care of nephrostomy, colostomy were some of my duties.

2022-2024

Behbood Private Clinic of Wound Healing

Professional Wound Care Nurse

As a professional wound care nurse, I have almost 2 years of experience in evaluating and managing patients with various wounds caused by accidents disease, or as a result of surgery, I am adept at assessing patient conditions and administering effective wound care, specially in checking for signs of infection and educating patients on effective wound care procedures. Also, I am professional in Assisting with the removal of dead tissue cleaning wounds, and Treating chronic wounds including bedsores, abscesses, and ulcerations. I am experienced in vacuum therapy and plasma therapy as well.

2020-2021

Referral Hospital

Covid 19 Nurse

There was a COVID-19 ward at a referral hospital that had 38 beds which covered patients who suffered from COVID-19 my duties consisted of, Monitoring patients' respiratory status and ventilator operation and making adjustments to promote stabilization. Delivering age-appropriate medical care for adult, adolescent, and geriatric ICU patients. Assessed and managed various patient treatments for numerous patient diagnoses from sepsis to acute respiratory distress.

2018-2020

Emergency Department of Peymaniye Hospital of Jahrom

Emergency Room Nurse

Working in the Emergency Department in a high-quality team made me a nurse who has experience in treating multiple life-threatening conditions such as various kinds of shocks, STEMI, stroke, tension pneumothorax, and cardiopulmonary resuscitation.
