WORK HISTORY

WORK EXPERIENCE

Anesthesia Technician

Berlin Health Care, Dubai UAE – December 2023 - Present

Anesthesia Technician Trainee

Rashid Hospital, Dubai UAE – MAY- October 2022

- Completed 6-month clinical attachment/work placement in the Anesthesia department
- Built on existing knowledge of Anesthesia techniques to become familiar with the hospital environment in Dubai

Anesthesia Technician

Sree Narayana Medical Mission Hospital, Varkala India 2014 - 2017

Duties/Responsibilities:

- Manage and organize anesthesia supplies and medications within operating and delivery suites. Ensure sufficient stock of medical oxygen, nitrous oxide, and air.
- Review the operating room schedule to determine specialized equipment requirements for specific procedures. Prepare the operating room accordingly.
- Maintain, calibrate, and address any issues with anesthesia department equipment as per equipment manuals and protocols.
- Ensure the readiness of the anesthesia machine, including troubleshooting and resolution of problems. Conduct daily inspections of anesthesia equipment, such as suction, electrical connections, gas lines, oxygen, and nitrous oxide cylinders.
- Provide assistance during sterile procedures, such as Swan-Ganz placements, blood transfusions, and the administration of spinal, epidural, and other pain-relief techniques.
- Anticipate and retrieve specialized anesthesia supplies requested by the anesthesia provider before and during surgery.
- Prepare advanced equipment and supplies for hemodynamic monitoring, which may involve setting up peripheral arterial and pulmonary artery catheter transducers, EKG, pulse oximeters, and nerve simulators, depending on the location.
- Ensure readiness of monitoring equipment and supplies.
- Aid in patient positioning for procedures.
- Assist the Anesthesia team during intubation and extubating procedures as instructed.
- Replenish all utilized supplies as necessary during surgical procedures.
- Properly dispose of contaminated materials and sanitize equipment following established biohazardous waste guidelines for operating rooms.
- Maintain awareness of patients' physiological parameters and baselines throughout surgeries.

Govt. H.S Veiloor. Sasthavattom 2008

EXPERTISE

- Microsoft Office (Word, Excel, Power point etc.)

LANGUAGE

- ENGLISH
- HINDI
- MALAYALAM

CLINICALS AND DIAGNOSTIC PROCEDURES:

Anesthesia Techniques assisted

- General Anesthesia
- Spinal Anesthesia
- Epidural Blocks
- Regional Blocks other than Spinal and Epidural
- Oro-tracheal intubation
- Naso-tracheal intubation
- Extubating
- Setting Anesthesia trolley and difficult intubation Cart
- Intra-operative Monitoring
- Tracheostomy
- CPR
- CVP
- Blood transfusion
- Fluid transfusion
- Blood gas analysis
- IV cannulation
- Tracheostom

Bio Medical Techniques: -

- Anesthesia machine daily checking and some troubleshooting
- Multi Para monitors
- Infusion Pumps
- Defibrillators
- ICU ventilators and settings
