Overview

As a Medical Lab Technologist, I am dedicated to contributing to a team with hard work, attention to detail, and strong organizational skills. I am driven to learn, grow, and excel in diagnostic laboratories. My education at Gulf Medical University, combined with practical experience at CAP and ISO accredited labs, has prepared me to excel in this role.

Experience

Medical Laboratory Technologist:

- **Dubai police health center – internship, (August 2024 to January 2025)**
I had an incredible opportunity to work in an ISO-accredited lab at the core of the Dubai Police Health Centre, where I've gained invaluable insights into the operations of a diagnostic lab.
- **Sharjah Blood Transfusion and Research Center – Internship, (May 2024)**
 - Follow hospital rules, be punctual, follow safety guidelines, communicate well, take initiative, and work as a team.
 - Understand test principles, assess donor eligibility, keep accurate donation records.
 - Prepare the donor's arm, monitor during donation, and give post-donation care instructions.
 - Prepare and store blood components (RBCs, platelets, cryoprecipitate, FFP) per AABB standards.
 - Conduct pre-transfusion tests, handle specimens, verify requests, perform blood grouping, Rh typing, and quality control.
- **Al Qassimi Hospital – Internship, (April 2024)**
 - Performed blood counts, used analyzers, and prepared smears.
 - Conducted chemical, microbiological, and infectious disease tests.
 - Performed antibody testing and operated immunological equipment.
 - Collected and handled blood samples with proper labeling.
- **Thumbay labs “CAP ACCREDITED”, (Jan 2021- June 2023)**
 - Conducts and records hematology, blood bank, biochemistry, serology, immunology, histopathology, and clinical pathology tests. Ensures accuracy and quality control.
 - Operates and maintains lab equipment, reports critical results, and communicates with healthcare teams.
 - Performs blood bank procedures, including blood typing, antibody screening, and compatibility testing.
 - Handles hematology, biochemistry, and immunology tests using specialized equipment.
 - Manages clinical pathology tasks, microscopy, and specimen analysis.
 - Ensures quality assurance, safety compliance, and patient confidentiality.

Education

Gulf Medical University, Bachelor of Medical Laboratory Sciences, Top honor (CGPA 3,96) – July 2024.

Certificates

- MOH evaluation and DHA eligibility.
- MedLab conference (February 2025).
- Gulf Infectious Diseases Forum- Day1&2 attendance (January 2025).
- Participation in Method Variation Training Session (December 2024).
- Student Council, class representative (August 2020 – August 2024).

Skills

- Fast learner.
- Specimen collection.
- Analytical thinking.
- Result reporting.
- Laboratory safety protocols.
- Quality assurance control.
- Quality of work.

Languages

- Native Arab
- Fluent English
