Summary

Recent PharmD graduate and licensed DHA clinical pharmacist with a comprehensive education in pharmacotherapy, patient-centered care, and drug therapy management. Professional at collaborating and communicating with multidisciplinary teams, conducting thorough patient assessments, and providing evidence-based medication recommendations.

Skill Highlights

- Capability of performing a comprehensive patient assessment and finding drug related problems.
- Competence in selecting, dosing, and monitoring of medications for optimal outcomes and minimal adverse events.
- Perform therapy judgement based on evidence-based medicine and patient needs.
- Counsel and educate patients about the drug therapy regimen.
- Manage drug related problems effectively and find alternative solutions.
- Proficient communication skills with the multidisciplinary team and patients.
- Keeping up to date with the most recent guidelines and clinical trials.
- Ability to collect data and analyze medication usage patterns.
- Expertise in medication reconciliation to prevent medication errors and optimize patient care.
