

Maher Radi Abdulgawad Radi

Radiologic Technologist

✉ maherradi91@gmail.com 📞 054 459 5873

📍 Al oroba building Aal maktom st. Alkhobisay, Dubai

Profile

Highly skilled Radiologic Technologist with over 6 years of experience in medical imaging, specializing in X-ray, CT scans, C-arm fluoroscopy, panoramic dental imaging, and digital radiography. Holds a DHA license for work eligibility in Dubai and other UAE regions. Adept at utilizing advanced imaging technology to provide accurate diagnostic results. Committed to patient safety, radiation protection, and high-quality imaging services. Strong ability to work in high-pressure environments, ensuring efficiency in emergency and trauma imaging.

Education

Special Diploma in Radiography and Medical Imaging 2021 - 2023

Health Technical Institute, Tanta, Egypt

Advanced coursework in CT, MRI, and interventional radiology techniques.

Diploma in Radiography and Medical Imaging 2015 - 2017

Health Technical Institute, Tanta, Egypt

Comprehensive training in diagnostic imaging and radiation safety.

Employment

Radiologic Technologist Jul 2018 - Present

Zefta General Hospital, Gharbia

Responsibilities:

- Conducted general X-ray, CT scans, and C-arm procedures.
- Ensured compliance with radiation safety regulations.
- Maintained imaging equipment and performed quality assurance checks.
- Assisted physicians in image-guided procedures.
- Trained junior radiographers and supervised technical staff.
- Collaborated with radiologists to optimize imaging protocols for enhanced diagnostics.

Radiologic Technologist Jan 2021 - Jan 2025

Madina Scan Center, Mit Ghamr, Al Dakahlia

Responsibilities:

- Operated CT scanners and digital radiography systems.
- Performed patient positioning for accurate diagnostic imaging.
- Monitored contrast media administration and patient safety.
- Assisted in interventional radiology procedures.
- Managed PACS and patient records efficiently.
- Provided patient education on imaging procedures to ensure comfort and cooperation.

Personal Skills

- Strong communication and teamwork abilities
- Adaptability to new technologies and procedures
- Attention to detail and accuracy
- Problem-solving in diagnostic imaging
- Commitment to patient care and safety
- Ability to work under pressure in high-paced medical environments
-

Radiologic Technologist

Sep 2020 - Nov 2022

Alrahma Hospital, Al Qatamia, Cairo

Responsibilities:

- Conducted various imaging techniques including panoramic and cephalometric X-rays.
- Managed radiation dose optimization for pediatric and adult patients.
- Assisted in portable X-ray imaging for emergency and ICU patients.
- Ensured compliance with hospital protocols and quality standards.
- Communicated effectively with radiologists to ensure accurate diagnostics.
- Worked closely with emergency teams for rapid imaging in critical situations.

Radiologic Technologist

Aug 2019 - Nov 2020

Future Scan Center, Tanta, Gharbia

Responsibilities:

- Performed CT scans and standard X-rays with a focus on quality imaging.
- Maintained detailed patient imaging reports.
- Operated C-arm systems in surgical procedures.
- Assisted in image reconstruction and enhancement techniques.
- Educated patients on radiation safety and imaging procedures.
- Conducted MRI safety training and assisted in MRI imaging processes.

Radiologic Technologist

Nov 2018 - Mar 2020

Radi Hospital, Al Santa, Gharbia

Responsibilities:

- Conducted general diagnostic radiology procedures.
- Ensured optimal image quality through proper machine calibration.
- Assisted radiologists in interventional procedures.
- Maintained compliance with health and safety protocols.
- Supported emergency and trauma radiology services.
- Supervised radiology students during training rotations.

Career Skills

- Diagnostic Imaging Proficiency – Expertise in X-ray, CT, and specialized radiographic techniques.
- Radiation Safety Compliance – Ensuring adherence to radiation protection protocols.
- Patient Care & Communication – Providing clear instructions and ensuring patient comfort.
- Equipment Maintenance & Quality Control – Regular calibration and troubleshooting of imaging devices.
- Emergency & Trauma Imaging – Quick and accurate diagnostics for critical cases.
- Interventional Radiology Assistance – Experience in guided procedures and contrast studies.
