Profile

Dr. Hemendra Mhadgut is *American Board Certified in Medical Oncology, Geriatric Medicine, and Internal Medicine*. He offers a comprehensive and a patient-centered approach shaped by dual fellowship training in oncology and geriatrics. This unique blend enables personalized cancer care for aging population; a rising demographic across UAE healthcare systems. Further reinforced by a Master in Public Health and extensive clinical experience across U.S. institutions, including Ochsner Lafayette General Hospital, East Tennessee State University and Eastern Virginia Medical School, the physician is positioned to deliver high-volume sub-specialty services within tertiary centers.

Currently practicing in a hospital-owned group and serving as a director and a physician at a clinic, his role encompasses patient management, staff oversight, and operational leadership; skills highly transferable to an expanding healthcare infrastructures in the UAE. Previous research tenure at MD Anderson Cancer Center and published contributions in oncology affirm a strong academic foundation and commitment to evidence-based medicine. His profile reflects readiness to integrate seamlessly into UAE health institutions seeking internationally trained consultants with both clinical depth and administrative insights.
